***Allowable Subject Matter***

**1. Claims 1-8 are allowed.**

The following is an examiner's statement of reasons for allowance:

The present invention relates to a wireless transmission apparatus and a modulation scheme selection method that can accurately select the optimal modulation scheme on a per block basis in a multi-carrier communication system where block division of subcarriers and adaptive modulation are performed.

The closest prior art, Niida et al. (US 7,136,427) shows a similar system and method of transmitting adaptive modulation signals using space-time block code matrix from a plurality of antennas, the method comprising the steps of: changing adaptively the number of transmission repeat times of the matrix according to a propagation condition, transforming modulation signals at each transmission repeat timing from each antenna by using the matrix, and sending the transformed signals at each transmission repeat timing from each antenna.

However, Niida fails to disclose or fairly suggests "... A wireless transmission apparatus that performs adaptive modulation with a multicarrier signal formed with a plurality of blocks, each block including a plurality of subcarrier signals, the wireless transmission apparatus comprising: a selection section that selects modulation schemes of the plurality of blocks on a per block basis; and a modulation section that modulates the plurality of subcarrier signals in the plurality of blocks using the modulation schemes selected on a per block basis, wherein the selection section

selects the modulation schemes on a per block basis based on an average and a dispersion of values representing propagation path characteristics of each block..."

This distinct feature has been added to the independent claim 1 and renders it allowable.

Claims 2-7 are allowed by virtue of their dependency on claim 1.

Claim 8 is the method claim associated with the apparatus claim 1 and is therefore allowed for the same reasons.

### ***Conclusion***

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
